

2nd Ave SE Chesley Construction 2018

The Municipality of Arran-Elderslie Water & Sewer Department along with Al Reich Construction from Walkerton are beginning construction on 2nd Avenue SE in Chesley.

The project will begin in early May and is projected to conclude around June 30th. The work includes new water and sewer main, water and sewer services to property line; storm water work, and sidewalk and asphalt installation

Please be advised that construction in the area could provide inconveniences such as heavy equipment traveling the local streets, reduced accessibility on the street, dust issues, and disruptions in the water service.

Municipal staff will make every effort to advise the residents of disruptions to their services, however there may be isolated instances where this may not be possible.

It is advised that you check your water daily prior to usage. Should you find any discolouration run cold water until the issue is resolved. Please check water prior to doing laundry.

We thank you for your patience and cooperation during these projects. Should you have any concerns or questions please feel free to contact:
